

ICEMAN COLD THERAPY

Your surgeon may order a device called an Iceman or Polar Care to make your recovery more comfortable. The machine replaces the need for ice packs. It pumps ice water into a pad that will cover your surgical area to decrease pain and swelling.

This machine is generally **not covered by insurance companies**, but you may purchase one on the day of your surgery. The **cost is \$184 for the Iceman and pad.**

You are welcome to borrow a functioning Iceman from a friend/family member if the device has been cleaned well prior to arrival at surgery center.

If desired, you could purchase a new **pad for the Iceman for \$53**

The model we stock at the Fox Valley Orthopedics Surgery Center is DonJoy Iceman Clear, but you may use a similar device.

Any questions, please call the surgery department at 630-524-0161 to speak with a nurse
